

2015 Competition BCPN Small Projects Health Research Grants recipients

Research Project	Principal Applicant	Institution
Unraveling the proteolytic substrates of the intestinal epithelial inflammasome and their role in intestinal immune defense	Bruce Vallance	UBC
Proteomic Assessment of the Ubiquitin Proteasome System in Schizophrenia	Clare Beasley	UBC
Proteomic analysis of systemic immunological changes caused by gut microbiota ablation	Bingyun Sun	Simon Fraser University
Development of strategies for the relative quantification of O-glycans on intestinal mucins	Wesley Zandberg	UBC Okanagan
Measuring the methyl-proteomics of progressive prostate cancer: toward a clinical replacement for PSA screening	Fraser Hof	University of Victoria
High-resolution analysis of phenotypic fitness using genome-wide CRIPSR editing coupled to quantitative mass spectrometry	Gregg Morin	BC Cancer Agency
Proteomics comparison of patient derived primary and xenograph expanded cancer cells	Philipp Lange	UBC
Chromatin epigenetic determinants of cocaine addiction	Juan Ausio	University of Victoria
